Re: Addendum for Degree Requirements

Please note that an official transcript from Temple University will be required once available.

In addition, the Bioinformatics admissions committee has determined that enrollment in the Spring-2 2020 Session is permitted while completion of the molecular biology prerequisite is underway. This prerequisite must be met prior to enrollment in the Fall-1 2020 Session.

Please contact your student advisor, Paris Mansoor, to assist with prerequisite options, course sequencing and scheduling, or any additional questions. She may be reached at 781-736-8733 or pmansoor@brandeis.edu.
