Michael Ruggiero
18 Pembroke St
Medford, MA 02155-4827

Hello Michael,

Congratulations on your acceptance to the Master of Science in Bioinformatics program!

I am pleased to have the opportunity to serve as your Student Advisor as you work towards your degree at Brandeis University Graduate Professional Studies. I recognize the challenges of earning a degree while balancing professional and personal responsibilities, and I will do my best to assist you throughout your student career. You are always welcome to write or speak with me about any concerns or questions that you may have while enrolled as a student.

You will be hearing from me periodically throughout each session and between terms. I will be sharing divisional and program news, as well as reminders pertaining to course planning, registration, start-of-term activities, and preparing for graduation.

Enclosed, you will find my contact information and an overview of resources available to you as a Brandeis student, including the current academic calendar. I look forward to working together with you towards your academic success!

Best,

Paris Mansoor
Student Advisor
